Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner inquired if there is sufficient support to a whereby clause (particularly the materials being "substantially dimensionally stable") in a feeding step in independent claim 89. Ms Luna cited page 19 for support to the claimed subject matter. Examiner suggested removing any reference to "substantially dimensionally stable" to avoid a potential problem with introducing New Matter to the original disclosure. Examiner also suggested canceling all non-elected claims to place the application in condition for allowance. Ms Luna agreed. Finally, Examiner informed Ms Luna that, one (GB 9903913.3) of the foreign priority documents is missing in the file. Examiner acknowledged that in a prior office action, it was noted receiving all foreign priority documents. Examiner informed Ms Luna that, Examiner may have been mistaken at that time, since the above document is not shown in EDAN. Ms Luna agreed to submit the missing document. On 06-21-05, Examiner made a courtesy call to Mr. Hagan. Left a message informing Mr. Hagan that, submission of a GB '913.3 priority document is no longer needed since a copy of it has been obtained in EPO web site.
